11D Engineer Brigade

Mine and Explosive Hazard Training

Soldiers with the 82nd and the 9th Engineer Battalion are taught to use the new Army Navy Personal Search System 14, or AN/PSS-14, at the Bamberg Local Training Area.

“The new system is using a ground penetrating radar, that looks for density changes in the soil and not only for metal. It’s a brand new and very sophisticated system,”

**-- SFC John Mincey,
Instructor Countermine
Counter Booby Trap
Center, Fort Leonard**

“We’re doing everything to get our soldiers ready and to lessen the danger, so their families know, that their beloved ones are well prepared,”

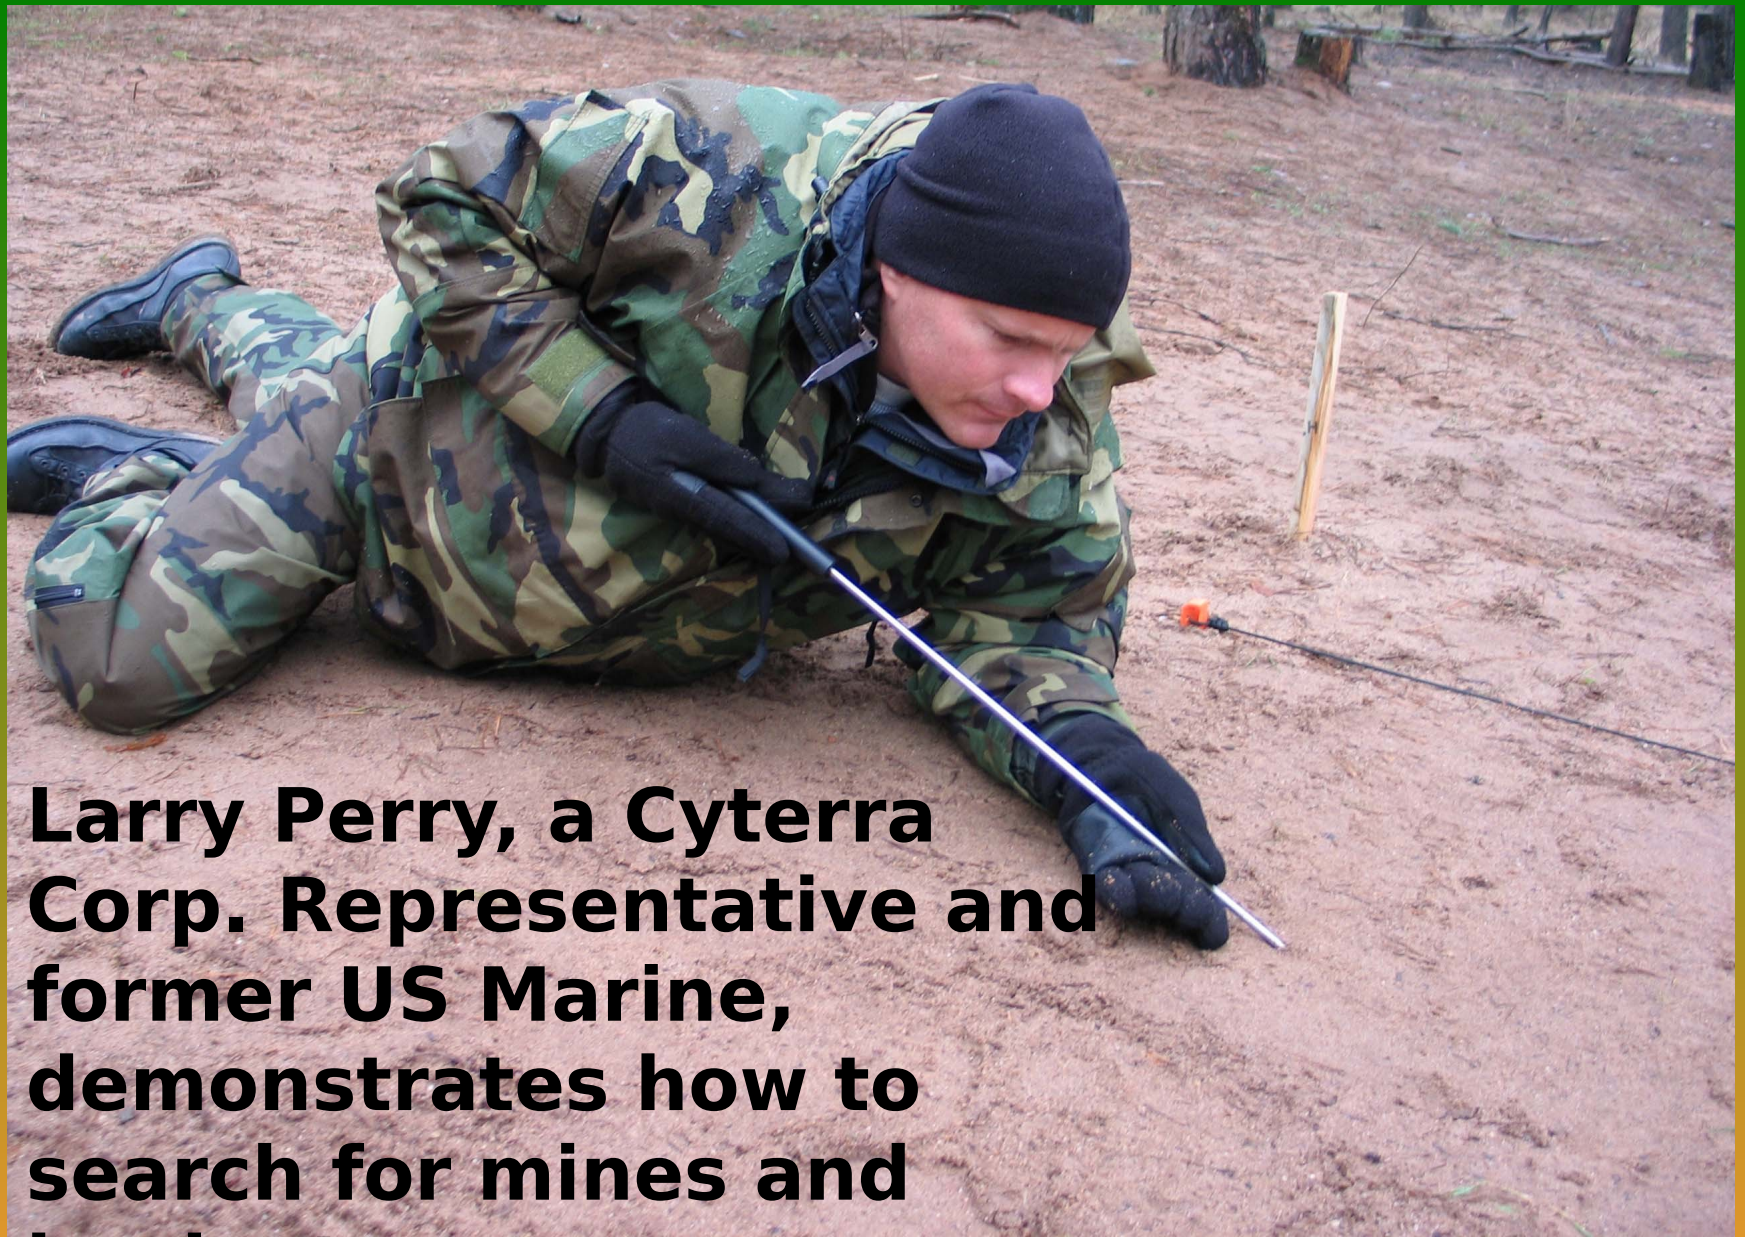

-- CSM Robert Winzenried, 1ID Engineer Brigade

Mine and Explosive Hazard Training

After detecting a mine, a soldier marks the spot with a plastic coin.

Larry Perry, a Cyterra Corp. Representative and former US Marine, demonstrates how to search for mines and booby traps.

MSG Mike Bergeron, instructor from the Countermine Counter Bobby Trap Center, demonstrates a possible mine threat during the “train the trainer” class at the 82nd Engineer Battalion Headquarters.

Mine and Explosive Hazard Training

MAJ James Gladwin, Chief of Countermine Training Division and UK Exchange Officer, demonstrates an explosive device.
